

CASE STUDY

Coordinating Channels

Email + Facebook Advertising Power The Customer Journey

marketing cloud

We send personalized emails, and engage people in social channels. Often, these activities are executed and measured in silos.

Have you ever wondered what would happen if you coordinated your marketing across channels?

This study connected transaction data, ad impressions, and email response for one retailer's marketing program, to better understand the impact of coordinating channels.

Would customers reached by both email and Facebook ads be **more likely to convert** than those reached by email alone? We partnered with an online retailer to find out.

Results based on a retailer's study conducted over two weeks in April 2014, targeting 925,000 US email subscribers using Salesforce Marketing Cloud and Facebook Custom Audiences. Facebook Offline Conversion Measurement matched and correlated ad impressions to email engagement and transactions. Findings are observational.

+

marketing cloud

Here's what happened:

-  18% only opened **emails**
-  27% only saw **Facebook ads**
-  16% opened **emails** *and* were exposed to **Facebook ads**
-  38% did not see ads or open email

TEST GROUP:  OPENED EMAILS ONLY  SAW BOTH EMAILS & ADS  SAW FACEBOOK ADS ONLY
